

Dear Hiring Manager,

It is with great enthusiasm that I recommend Sergio Garcia Poderoso as a candidate for a 2D/3D artist position.

Creative, dedicated, and passionate about every aspect of game development, Sergio is one of those rare developers who can see the big picture while staying focused on the small details.

From my experience as one of his direct supervisors, Sergio is always eager to take on a daunting task or learn a new skill and is an integral part of our core team. Whether our projects were big or small, Sergio always found a way to meet seemingly impossible deadlines without sacrificing an ounce of quality. Finding individuals who can juggle so many responsibilities while wearing a plethora of hats is extremely rare.

A great communicator, natural-born leader, fast learner, and extremely creative developer, Sergio is intimately familiar with the art pipeline and able to fill project gaps extremely fast. Do not miss an opportunity to work with him.

If you have any further questions or concerns about Sergio's candidacy, I would be happy to discuss them.

Best,

Daniel DeMaiolo  
Lead Game Designer/Project Manager
